

The Synco Mission

Synco Research Solutions is dedicated to providing you with only the most experienced clinical research associates to ensure that your trials are carried out at the highest level of quality.

ABOUT US

Synco Research Solutions is an owner operated clinical research monitoring firm focused on delivering cost effective quality monitoring services. We were founded by highly experienced clinical research professionals with a passion for a small, agile, team based approach to monitoring.

Synco – Solutions

- ✓ We provide highly trained clinical research associates with a wide range of experience entailing all aspects of a clinical trial. Each of our CRAs have many years of field monitoring experience and have served in a leadership capacity.
- ✓ We have clinical research associates in all regions of the United States, offering complete coverage for all your sites.
- ✓ We are owner-operated which translates into significant savings for our clients without compromising on quality, experience, or integrity.
- ✓ Our combined experience spans both pharmaceutical and medical device trials including phase I-IV studies, controlled substance studies, class III medical devices, and post approval

Clinical Research Monitoring

- ✓ We offer a responsive, collaborative, and flexible approach; which allows us to effectively tackle your monitoring deliverables in a quick and efficient manner. Each member of our project team is trained to the specifics of your study in order to facilitate positive site/sponsor relationships, maintain an engaged site study team, and to ensure the successful roll out and completion of your study from the field monitoring perspective. We offer coverage in all regions of the United States and can deploy senior level clinical research associates as a multi member quick response strike team or as independent monitors.
